Output

Model

# Call:
## train.kknn(formula = fmla, data = ivory.train, kmax = 15, distance = 2, kernel = knl)
##
# Type of response variable: nominal
# Minimal misclassification: 0.3765867
# Best kernel: triangular
# Best k: 15
Classifier: country_code
Map of best fitted reference sample

Best fitted reference sample:

- Site: Northeastern Zambia, near Chilonga
- Country: ZM
- Region: Southern Africa
- CITES: Appendix I
- Lat: -12.12
- Lon: 31.44
Assignment of test sample to nearest neighbours

Best fitted reference entries

Table 2: Details of best fitted reference entry (row 1) and other fitted entries within best classifier

Country of prediction: ZM

Testing robustness of assignment: Wilcoxon signed rank test

If p-value > 0.05, the test concludes that the isotope signature of the test sample is similar to the respective nearest neighbour reference sample.
P-values for the k nearest neighbours in Wilcoxon Test

“0.001338314, 0.000515506, 0.000221484, 0.000040640, 0.000013100, 0.000005028, 0.000001160, 0.000001160, 0.000000026”

Goodness of fit of test sample:

- good fit: if \( p > 0.05 \) for at least two tested nearest neighbour reference samples;
- moderate fit: if \( p > 0.05 \) for at least one tested nearest neighbour reference samples;
- uncertain: if \( p > 0.05 \) for none of the tested nearest neighbour reference samples.

Assumption: At least two nearest reference samples are available.

Overall goodness of fit of test sample: “uncertain”
