Map of best fitted reference sample

Best fitted reference sample:
- Site: Congo, 15 km in the South of Loudima
- Country: CG
- Region: Central Africa
- CITES: Appendix I
- Lat: -4.2
- Lon: 13
Assignment of test sample to nearest neighbours

Testing robustness of assignment: Wilcoxon signed rank test

If p-value > 0.05, the test concludes that the isotope signature of the test sample is similar to the respective nearest neighbour reference sample.

P-values for the k nearest neighbours in Wilcoxon Test

“Attention: only 1 reference site. Wilcoxon Test is uncertain.”

Goodness of fit of test sample:

- good fit: if p > 0.05 for at least two tested nearest neighbour reference samples;
- moderate fit: if p > 0.05 for at least one tested nearest neighbour reference samples;
- uncertain: if p > 0.05 for none of the tested nearest neighbour reference samples.
Assumption: At least two nearest reference samples are available.
Overall goodness of fit of test sample: “uncertain”
