Output

Model

##
## Call:
## train.kknn(formula = fmla, data = ivory.train, kmax = 15, distance = 2, kernel = knlk)
##
## Type of response variable: nominal
## Minimal misclassification: 0.1889986
## Best kernel: triangular
## Best k: 14
Classifier: region
Map of best fitted reference sample

Best fitted reference sample:
- Site: Central African Republic
- Country: CF
- Region: Central Africa
- CITES: Appendix I
- Lat: 8
- Lon: 19
Assignment of test sample to nearest neighbours

Best fitted reference entries

Table 2: Details of best fitted reference entry (row 1) and other fitted entries within best classifier

Region of prediction: Central Africa
Testing robustness of assignment: Wilcoxon signed rank test

If p-value > 0.05, the test concludes that the isotope signature of the test sample is similar to the respective nearest neighbour reference sample.

P-values for the k nearest neighbours in Wilcoxon Test

“0.6848475, 0.0055961, 0.0018749, 0.0005277, 0.0000019, 0.0000001, 0.0000001, 0.00000001, 0.00000001, 0.00000001, 0.00000001, 0.00000001, 0.00000001”

Goodness of fit of test sample:

- good fit: if p > 0.05 for at least two tested nearest neighbour reference samples;
- moderate fit: if p > 0.05 for at least one tested nearest neighbour reference samples;
- uncertain: if p > 0.05 for none of the tested nearest neighbour reference samples.

Assumption: At least two nearest reference samples are available.

Overall goodness of fit of test sample: “moderate fit”
